Project Planning

1. *The purpose of the site*

The world likes movies. People may not read books, but everybody enjoys the experience of a good movie. The purpose of the website is to pique interest and attract mature people to a cinema experience. You can find information about the movies offered, see their screen time, watch a trailer and buy a ticket.

2. *A brief description of the content*

Homepage:

The homepage represents the branch of Eye Candy Cinema. You can find a brief idea of which movies are played at the moment. From here you can get directed to the trailer or go to the booking pages of the cinema Branches in New Zealand.

Now Playing:

On this subsite you can see all movies played in the cinemas on a single page. You can find some basic movie info such as title, length and genre as well as links to see a trailer or get to the schedules.

Trailer Overlay:

Each Movie has it's Trailer Overlay where you can see the embedded YouTube trailer and a plot description.

Schedule Auckland:

This subpage gives you details about the screening schedule for The Auckland Eye cinema and you can directly book your preferred timeslot.

Schedule Wellington:

This subpage gives you details about the screening schedule for The Wellington Eye cinema and you can directly book your preferred timeslot.

Contact:

This page includes a google map location as well as contact information for each cinema branch. a submit form to get in contact with Eye Candy Cinema.

Contact Overlay:

The Overlay contains a form to get in contact with the cinema if you have requests or need help with bookings.

Thank you:

After submitting the contact form you get forwarded to the thank you page. You can find a Home button to get back to the Homepage.

3. *The target audience*

My main target audience is aiming for an age group from 20 – 40 and is focusing on Young adults, Students, Singles, Couples and Adults to spark their interests for a good affordable movie experience. This gives me the opportunity to present high quality movies to people at different life stages and different income ranges.

4. *Research conducted*

Researched websites:

In research for the website layout and which information should be displayed, I've looked at several websites mentioned below. In essence the sites are upfront and show their audience which movies they are screening directly on their homepage. Each cinema website had a schedule subpage showing screening time and screening theatre of the desired movie.

Below I've added the ideas gathered from the websites for my layout

Things to avoid:

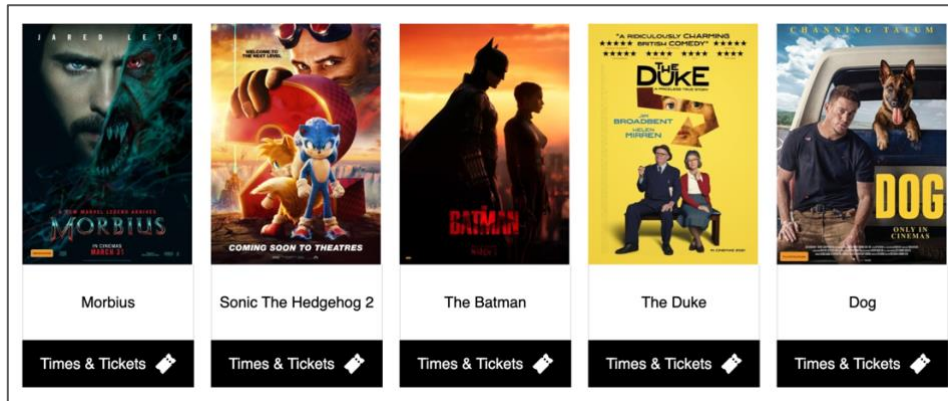

I want to avoid unnecessary clutter or overloading of page content. I want to present a clean and easy website experience. To do so I reduce the amount of links the user has to go through and also reduce the number of external links to a minimum.

In addition I made sure that I don't have any deadlink on my pages. E.g. not leaving site to open a pdf doc or all pages include at least one "Home" button.

Cinema:

Event cinema: <https://www.eventcinemas.co.nz/>

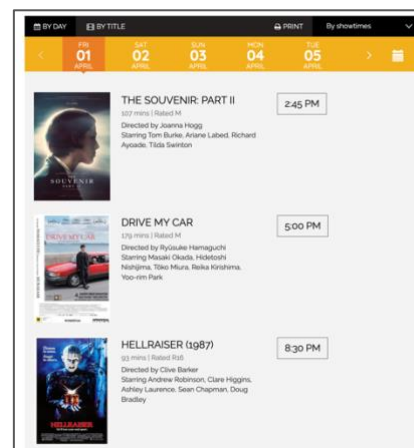

The Event Cinema has a “Now showing” section which includes a movie picture, title and a times & ticket button. I’ll try to implement this on my homepage so users can directly jump to the schedule of the movie. I also collected the movie images for several movies.

Academy Cinema:

<https://academycinemas.co.nz/>

On their homepage you get direct access to their screening schedule. I like the idea that you can click through the days and it will show which movie is screened including basic movie info (e.g. title, length, screen-time, director and actors)

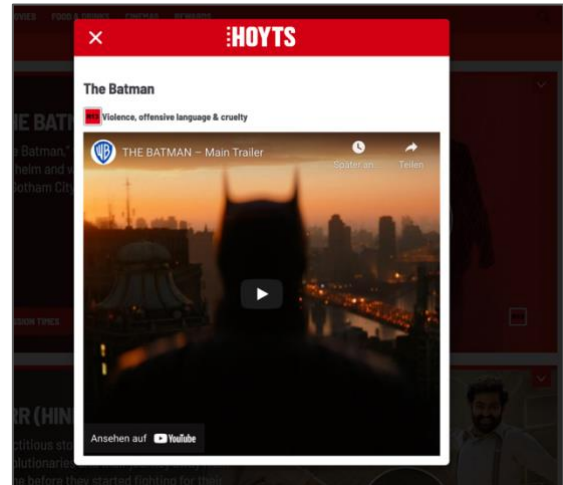

I also like the presentation of a single movie. The page layout includes further detailed information about the movie, a trailer and the specific screening time for that movie only.

HOYTS Cinema:

<https://www.hoyts.co.nz/>

On HOYTS I saw that they overlay the whole page with a trailer card which I find appealing. It blends out the rest and you can focus on the trailer without wondering off to a different website. I'll try to recreate the experience.

Light House Cinema:

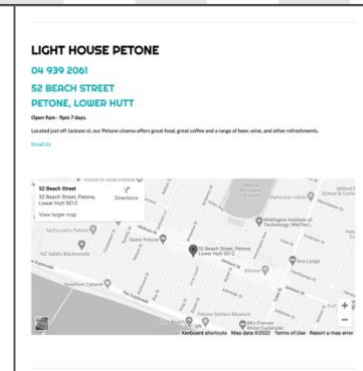

<https://www.lighthousecinema.co.nz/>

A modern approach in style and layout can be found on the Light House Cinema website. I really enjoy the overall experience on this website and the layout of the pages.

The Schedule page is inspiring in its simple content and stylish layout.

	Fri 01 Apr	Sat 02 Apr	Sun 03 Apr	Mon 04 Apr	Tue 05 Apr	Wed 06 Apr	Thu 07 Apr
New schedule Tuesday afternoon. Quarries? Call us, we'd love to help.							
THE BATMAN	Petone						
	7:30PM Book	5:00PM Book	7:15PM Book	7:30PM Book	7:30PM Book	7:30PM Book	
	Cuba						
	4:45PM Book	1:45PM Book	3:30PM Book	2:15PM Book	1:00PM Book		
	Paotatani						
	7:30PM Book	7:30PM Book		7:30PM Book	7:30PM Book		

Especially the "Contact" page is a nice representation of cinema location and contact form.

Movie Info:

Following websites were used to gather general and detailed movie information as well as content for the single movie pages and the list of all movies playing at Eye Candy Cinema.

IMBD: <https://www.imdb.com/>

Rotten tomato: <https://www.rottentomatoes.com/>

Audience Research:

To get an idea which audience the cinema is focusing on I read through the content of this article.

ICO: <https://www.independentcinemaoffice.org.uk/advice-support/how-to-start-a-cinema/understanding-audiences/>

Color Theme:

To choose a fitting color pallet I used the website <https://colorhunt.co/>
Eventually I found this [color pallet](#).

6. The wireframe sketches

Header

Social Links

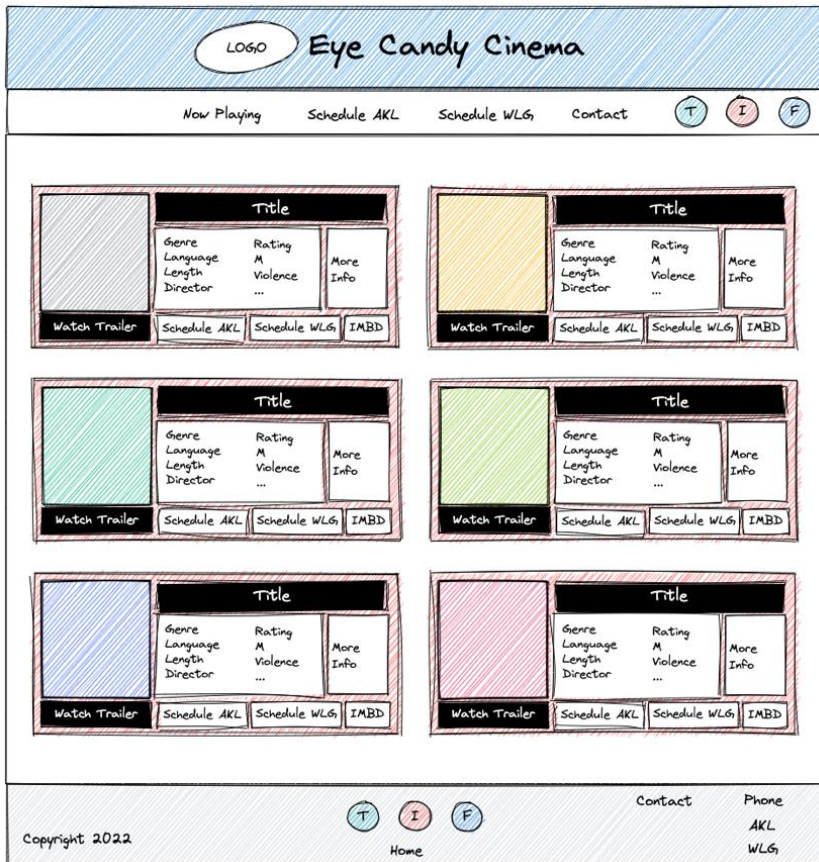

Footer

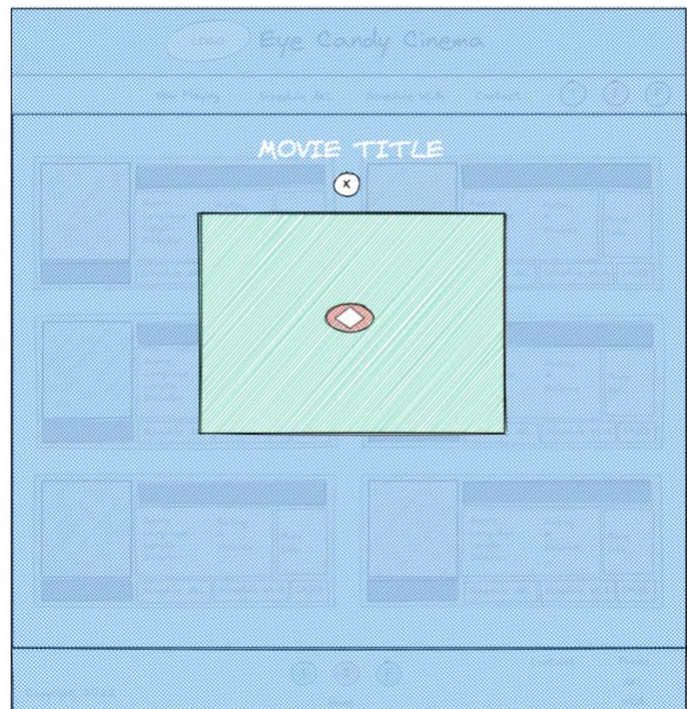

Homepage

Now Playing

Trailer Overlay

Schedule

The wireframe shows a web page for 'Eye Candy Cinema'. At the top is a header with a logo and the cinema name. Below the header is a navigation bar with links: 'Now Playing', 'Schedule AKL', 'Schedule WLS', and 'Contact'. There are also three circular icons labeled 'T', 'I', and 'F'. The main content area contains three identical movie schedule tables. Each table has a 'MOVIE TITLE' header and a grid of dates from Monday 07 Mar to Sunday 13 Mar. Below each date is a time slot (12:00) and a status (BOOK). The first table has a light blue background, the second has a light green background, and the third has a light pink background. To the right of the tables is a vertical scrollbar. At the bottom of the page is a footer with 'Copyright 2022', a 'Home' link, and three circular icons labeled 'T', 'I', and 'F'. There are also links for 'Contact', 'Phone', 'AKL', and 'WLS'.

Book Movie

The wireframe shows a web page for 'Eye Candy Cinema' in a 'Book Movie' state. The header and navigation bar are identical to the 'Schedule' page. The main content area contains three identical movie schedule tables. Each table has a 'MOVIE TITLE' header and a grid of dates from Monday 07 Mar to Sunday 13 Mar. Below each date is a time slot (12:00) and a status (BOOK). A large black 'X' is overlaid on the first table, and the text 'Unfortunately The Movie Is Fully Booked. Sorry!' is written across the middle of the page. To the right of the tables is a vertical scrollbar. At the bottom of the page is a footer with 'Copyright 2022', a 'Home' link, and three circular icons labeled 'T', 'I', and 'F'. There are also links for 'Contact', 'Phone', 'AKL', and 'WLS'.

Contact

Hand-drawn wireframe of the 'Contact' page for Eye Candy Cinema. The page features a blue header with the 'Eye Candy Cinema' logo and navigation links: 'Now Playing', 'Schedule AKL', 'Schedule WLG', and 'Contact'. The main content area is divided into two columns for 'Auckland' and 'Wellington'. Each column displays a map with a red location pin, followed by a contact form with fields for 'Address', 'Zip-Code', 'Phone', and 'Email', and a 'Contact' button. The footer includes 'Copyright 2022', a 'Home' button, and a 'Phone' link for both AKL and WLG.

Contact Form Overlay

Hand-drawn wireframe of the 'Contact Form Overlay' for Eye Candy Cinema. The overlay is a white box with a black 'X' in the top left corner, set against a blue background. It contains a 'Contact Form' with fields for 'Firstname', 'Lastname', 'Phone Nr.', 'Email', and 'Message'. Below these fields are radio buttons for 'How should we contact you?' (Phone, Email) and a checkbox for 'Terms and Condition'. 'Cancel' and 'Submit' buttons are at the bottom right.

Thank You

Hand-drawn wireframe of the 'Thank You' page for Eye Candy Cinema. The page features a blue background with a white central box containing the text: 'Hi there. Thank you for contacting us! Your message has been received! One of our staff members will be in contact with you soon!'. Below the text is a 'Back Home' button. The header and footer are identical to the 'Contact' page.

7. A brief test plan

Chrome Browser:

Test Area	Test Scenario	Result
EVERY PAGE		
	Do they open?	Yes
	Do they display properly?	Yes
	Is content missing?	No
DO ALL LINKS WORK		
	Homepage	Yes
	Now Playing	Yes
	Overlay Movie	Yes
	Schedule AKL	Yes
	Schedule WLG	Yes
	Contact	Yes
	Overlay Contact Form	Yes
	Thanks Page	Yes
OVERLAY MOVIE		
	Does the video play?	Yes
HEADER		
	Does every link work for all pages?	Yes
FOOTER		
	Does every link work for all pages?	Yes
FORM		
	Can it be filled out correctly?	Yes
	Can it be submitted?	Yes
	Does it link to Thanks page?	Yes

Task	Done
Task 1: Project Planning	
Planning notes provided in a file named IT5012_Project2_Plan_<YourStudentID> and uploaded to iQualify	
Cover page with project and website title, student name and date	
Site purpose and description	
Site's target audience	
Evidence of research	
Time plan or schedule	
Test planning notes	
Wireframes for the required four pages	
Task 2: Building the Website	
Web project files zipped into a file named IT5012_Project2_Website_<YourStudentID> and uploaded to iQualify	
Site is developed according to the project plan and wireframes	
The site is made up of at least 4 pages	
There are least two internal links	
There are at least two external links pointing to different sites with related content and each opens on a different tab	
There is a web form that uses the action attribute	
There is an HTML table that shows data appropriate for row and column presentation	
There are text, lists, images and multimedia content	
There are at least three elements that use CSS3 properties	
Site is navigable, functional and presentable (there is nothing obviously broken on the site)
